## The digital-first, cloud-first, AI-first enterprise

The overriding theme that defines reality today is uncertainty. Each new day brings new inputs that demand that we question the carefully-crafted models we have constructed. Advanced digital technologies like AI and cloud, and more recently, generative AI, bring with them the ability for enterprises to imagine and execute for multiple options in the future. They bring the ability to continually transform companies into organizations that can truly realize human-machine synergies, and fundamentally rethink organizational design to segment cognitive tasks to get the right balance between people, technology, and process.

Today, Infosys is steadily progressing towards a future where we don't just solve immediate business problems, but continually innovate and architect for challenges that may emerge in the future. We build it for ourselves first, and then, deeply rooted in our own experience, take it widely to our clients.

Infosys is well-positioned to support clients in two critical areas - their digital transformation as well as their cost efficiency and automation programs. As part of our digital services and solutions, we offer:

Strong capabilities in generative artificial intelligence to enhance how we enable our clients to derive value. These capabilities are available to them in the form of Infosys Topaz™.

Infosys Cobalt™ capabilities for the cloud that continue to resonate with our clients.

Our platforms, including Finacle for banks, McCamish for insurance, Equinox for commerce, and Helix for healthcare, that continue to help our clients differentiate themselves in the market

## The Infosys Commitment

Infosys' commitment to the region dates to 1999 when Infosys entered the Australian market and the year 2009 when Infosys established presence in New Zealand. Infosys Australia and New Zealand has experienced strong and consistent growth in revenue since its inception. Infosys Australia and New Zealand services clients in a range of industries, including financial services, telecom, utilities, public sector and more.

## Digital Innovation Partner of the Australian Open

Infosys, as the Official Digital Innovation Partner of the Australian Open, leverages its digital experience and technological expertise to provide unique, innovative and engaging experiences for fans, players, coaches, partners and the media.

Infosys and Tennis Australia joined hands with the goal to transform the Australian Open into one of the most technologically advanced sporting events in the world. The extended collaboration with Tennis Australia until the end of 2026 will introduce enhanced broadcast match statistics and new initiatives to make tennis more accessible for all, while continuing to develop innovative digital stakeholder experiences.

## Community Program and Academic Partnerships

We work with top universities in Australia and New Zealand and offer our globally #1 rated internship program InStep to their students.

To further enable digital skills and accelerate innovation in Australia and New Zealand, for the fifth year running Infosys was the lead international sponsor for GovHack – a continent wide hackathon across Australia & New Zealand. Infosys Springboard, Corporate Social Responsibility program by Infosys Australia and New Zealand was announced in Feb 2021 to help create a more equitable community by enabling inclusive education, digital learning and engagement experiences. Our goal is to contribute significantly to our global ESG ambition 2025 to inspire 10 million people to start their digital learning journeys, and to find new and exciting life pathways. Infosys and Tennis Australia announced a CSR collaboration to drive new digital learning and accessibility initiatives creating pathways to learning and education for under-represented communities.
