

PROJECT: OPEN BANKING

Open Banking is the Consumer Data Right as applied to the banking industry. The Consumer Data Right was introduced by the Australian Government to give customers greater control over their data. Customers can choose to share their bank data with third parties accredited by the Australian Government (known as Accredited Data Recipients) that must meet strict requirements to receive data.

DESCRIPTION OF SERVICES

Altitude Consulting has been appointed to provide consulting services with the following guidelines.

Required Capability

- Capture and grooming requirements into epics, features, user stories and dependencies in collaboration with the squads that aligns with business requirements.
